

I have created a State House District plan that creates 12 majority black districts, 5 other majority minority districts but whites are still the largest racial group with percentages between 38-50%, and 1 district where hispanics make up the largest group in a district with 48% of the population. I have created 17 majority minority districts with 1 district with whites making up 50% of the population and minorities making up the remaining 50%.
